SAY HELLO TO

TOYOTA'S AUDIO MULTIMEDIA & CONNECTED SERVICES

Starting with select 2022 vehicles, Toyota's new Audio Multimedia system brings in-vehicle entertainment and connectivity into a whole new generation. Top new features include wireless Apple CarPlay®[1] and Android Auto™[2], support for user profiles, seamless integration with the Toyota mobile app, and of course, a great-looking new interface. Even Connected Services[3] gets an upgrade with a new Drive Connect[4] service and enhanced Wi-Fi Connect[5] functionality. Let's dive in.

BLUETOOTH®

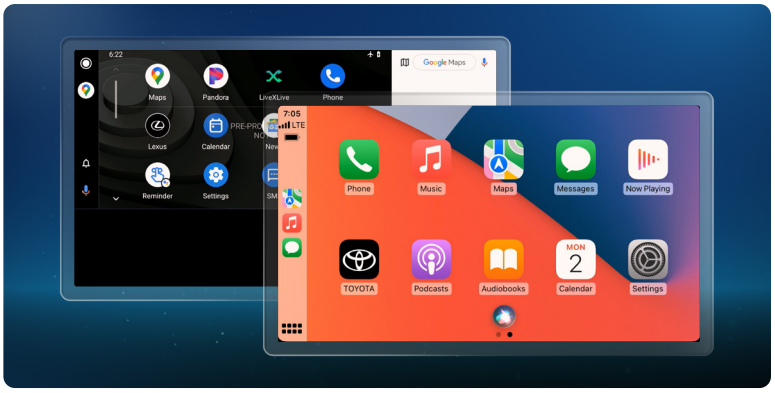

With this latest system, a seamless connection to your mobile devices is key for both driver and passengers.

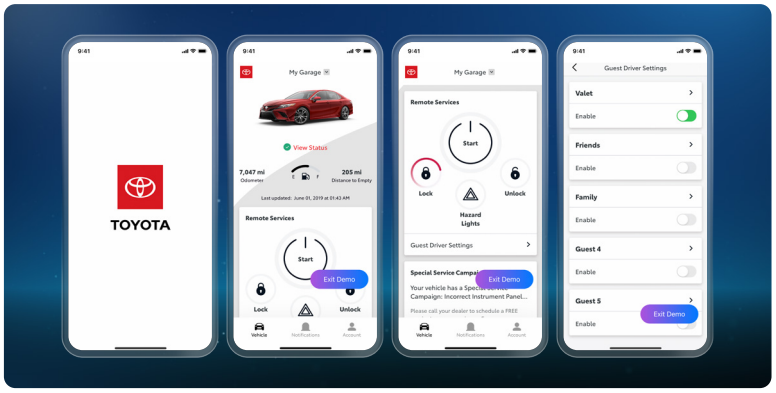

- A simplified *Bluetooth*®[6] pairing process is now a standard step during registration.
- Pair up to five devices – two of which can be used simultaneously!

APPLE CARPLAY® & ANDROID AUTO™

It's easier than ever to stay connected to your iPhone®[9] or Android device.

- Wireless Apple CarPlay®[1] and Android™[2] Auto mean no more plugging in.
- Navigation handoff feature keeps directions at the ready.

TOYOTA APP

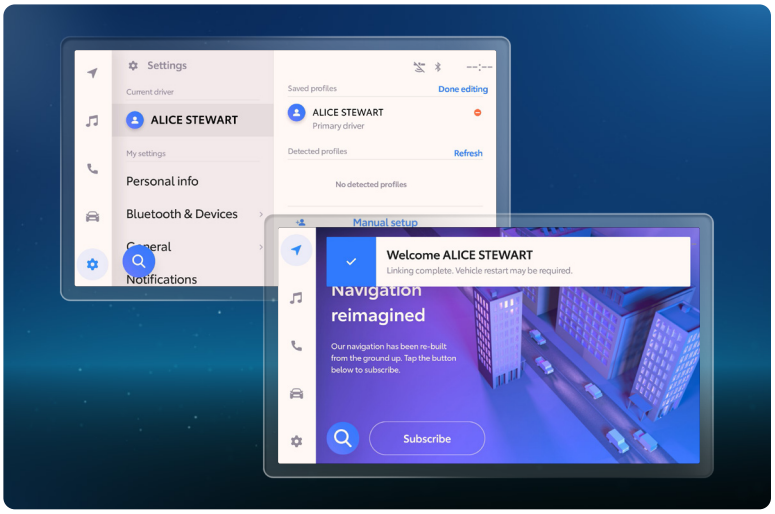

The Toyota mobile app[7] is an important part of making the most of Toyota's new system.

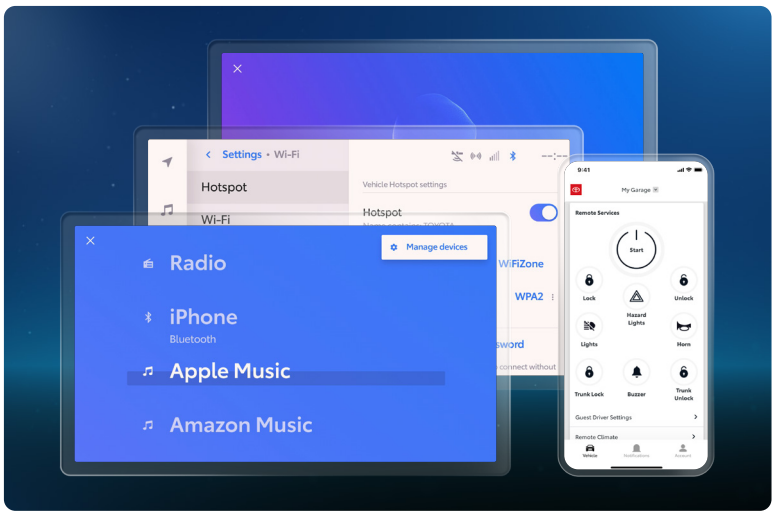

- Create your Toyota account and register your vehicle.
- Activate and manage your Connected Services – like remote vehicle access.
- Automatically pull up user profiles when connecting to the vehicle.

USER PROFILES

Everyone knows that a vehicle doesn't really feel like it's yours unless it has your settings.

- Create user profiles to store settings that range from radio stations to seat adjustments.
- Multiple drivers in the family? No problem. Save up to three unique profiles.
- Pair profiles to specific mobile devices and key fobs.

CONNECTED SERVICES

Toyota's Connected Services[3] get an upgrade with the new system, too.

- Wi-Fi Connect[5] now has an Integrated Streaming feature with support for Apple Music[9] and Amazon Music[10].
- A brand-new Drive Connect[4] service rolls together Cloud Navigation[11], Destination Assist[12], and Intelligent Assistant – a cloud-based virtual assistant that replaces the previous Voice Recognition system.

And this is just scratching the surface. Toyota's latest-generation Audio Multimedia system delivers so many incredible capabilities to both drivers and passengers. And it'll just keep getting better, too, thanks to the added convenience of wirelessly installed "over-the-air" updates that can be performed right at home.
